## Mission

Established in 1978, Visual Art Institute's (VAI) mission has remained unchanged: it is to foster and develop the creative voices of youth, by assisting them in exploring their imagination and artistic abilities through in-depth training, independent study, and experimentation in all forms of visual art.

## Vision

VAI believes that learning art can be a powerful way to enhance all aspects of life and all areas of education. Our goal is to provide opportunities for students to work with a wide range of traditional art media and new technology, while teaching them to be independent in their thinking and creativity. The positive peer and mentor relationships found at VAI help students maintain their creative voice, while developing problem-solving abilities, self-confidence, collaborative learning skills, and critical thinking.

## Teaching Approach

VAI is unique for its innovative, non-directive teaching methods. In every class, students are given specific learning objectives without restrictive step-by-step instructions. They are encouraged to generate original ideas from their observations, memories, experiences, and imagination. This approach preserves individual creativity, and promotes a greater thirst for expressing their ideas, in art and beyond.

## Curriculum & Portfolio Development

VAI's comprehensive curriculum is designed for in-depth learning in a broad variety of art concepts, media, and techniques. Each course is intended to dovetail with the other courses to give students a strong visual language, resulting in award-winning portfolios. Alumni report that their experience at VAI has improved their ability to think creatively and excel in all areas.

VAI is sponsored in part  
by Salt Lake County  
Zoo, Arts, and Parks.

We also offer summer intensive workshops.
